About This Game

8BitMMO is a retro-style 2D massively multiplayer game! It's a giant construction sandbox -- you can build a home or a castle in a persistent streaming world. Found and manage your own city. Fight evil LawyerCats and engage in Player vs Player battle.

Features

100% Player Built World - The entire world is built by players. Build your own house, town, voxelart, or dungeon. The world is massive -- there's plenty of space to build in, and it streams in as you explore (no load screens).

Be the Mayor - Start your own town and invite your friends. You'll have an array of management tools for overseeing your town.

Interactive Development - The entire game only has one full-time developer, and development is still ongoing. You can submit and vote on ideas -- many of the top voted ideas have been implemented into the game. Free updates with new content and features are frequently released.

Anti-Griefing Systems - Several systems protect players from griefing.

Free To Play - No purchase necessary to have fun. Support the developer and buy a fancy hat... or don't. (Premium items give NO competitive advantage)

Customize your Character - Wear hats, clothing, accessories, change your skin color

Become a Zombie - Want to be a zombie? You can! But you'll need a steady supply of delicious brains from other players. Don't worry, after you eat their brain, they'll be zombies too!

Fight Nefarious Enemies - Congressional Lobbyist Slugs, LawyerCats, and Hipsters oh my.

MegaMap - The world is huge, so the MegaMap interface (based on Google Maps API) is a handy way to browse the world and share your creations with friends.

Music - Enjoy chiptune from legendary artists Danimal Cannon, Zef, PROTODOME, and Honin Myo Audio.

Very relaxing puzzle game that plays with perspective and the laws of physics. Its like navigating around an MC Escher drawing that you can rotate and manipulate. It is very much like Monument Valley for Android or iOS. I really enjoyed that game and played through all the available levels they put out. Finally I get a similar game play and aesthetic from this game with some new twists. Definitely worth the 2 dollars.. I'm 3 hours in and having a blast with this game. This is the first wave shooter I've seen on here with any depth. The environments are varied and look good, I've seen a bunch of enemy types so far and I'm only on level 6 of 20. Upgrading and unlocking weapons and armor adds to replay. Lots of content and lots of fun for 12 bucks.. For a basically a text quest game, the font is pretty hard to read, and also white on black makes your eyes tired too quickly, which makes the whole game feel like a chore.

There's too much reading, and not enough making choices. On top of that the texts are not very well written and there's not enough art to support them. Even grammatically, this game's full of mistakes. There's games out there with proper graphics, that are written much better and provide more opportunities to make choices. Since this is a text quest, you expect much higher quality in these aspects. So this is pretty disappointing.. Not that good, could be a lot better if the controls were actually functional.

5/10. Fun puzzle game with very interesting art design. Easy to 100%

New mechanics and locations are what make these heists so unique. Instead of the same old mundane task of "place drill, fix drill, take money, leave bank" you get to things like skydive and drive boats and destroy satellites and refuel helicopters (ok that last one is still just wait time). You get two of the best heists in game for the price of one. The melees are actually usable this time, even up to par with the katana. The Baby Deagle is a quicker but slightly weaker Deagle, as you'd expect. Overall, this is probably one of the best DLC's yet. Just buy it already, who even reads DLC reviews?. A well made Riichi Mahjong game with a good variety of rulesets to choose from. An easy to understand interface with audio and visual indicators make the game accessible even for people new to the game. The customizable color of the tiles and the board make for a good extra touch. The biggest issue still seems to be just finding people to play the game online, even though the bot support is also available. Speaking of the bots, the AI could be a tad bit better, especially when playing with a mix of bots and real players.

Overall the game was a really nice idea, its hard to find a proper Riichi Mahjong game in English. Tenhou is a thing, but that's in Japanese only.. **DO NOT BUY THIS!** A multi-player game with **NO PLAYERS** online.. ever. The game is dead and it's been dead for some years. Oh and about Steam support, they are not going to refund you. I played only for 16 minutes and all I get is auto-reply mails from Steam.

Anyways, I hope no one else falls into this money trap.

Cheers. totally worth it. **What is the heist about?**

Day 1:

A bit like a shorter version of Hoxout (Day 2) in a similar map design to Goat Heist (Day 2).

For the ones unfamiliar with that: Basically keeping a process running (repairing a motor bike) which is interrupted by 3-4 errand jobs. For example, getting an engine or tools, etc. on a small to medium sized map. At the end, there is a short(er than in Car Shop) bike ride escape.

Day 2:

Extremely straight forward: Pretty much like the plane part in Birth of Sky with more obstacles: Run up train carriages like in the old Western movies, kill a boss, grab an item and the same way back to the start.

Noob friendly?

Yes on lower difficulties, since you don't need much team coordination due to the sequential character of the tasks. On higher difficulties, there is just a massively increased spawn rate (Bit like The Diamond). But there are tougher and more complex heists out there.

Any good?

Well, I know Harley's are awkward to ride, but they are still no battle tanks. A bit too much "Harley feeling" going on while trying to drive it. But apart from that, the heist fits in and is fun. Especially for everyone, who liked Hoxout Day 2 w/o the drag of the first day. Female gangsters are also cool, but in general it is difficult to tell civilians from thugs in this heist.

All in all defo one of the better DLC heists, perhaps even the best since the Point Break heists and worthwhile since it is short and entertaining.

The other stuff:

- Throwable is apparently weaker than both the knife and the javelin, but given on top of a decent heist, it is a nice plus. The axes look kinda cool though.

- The masks are one of the better looking ones, apart from that, who cares about that cosmetical stuff?. I have some of the other big budget fpv sims in my library but I keep coming back to this one. Superb!. To those of us that remember the true difficulty of the age of the NES, this game will seem like stepping back to when we were kids staring in front of the huge TVs with our controller in hand, getting upset at the slightest misstep killing us. This game stays true to its form and its homage. A warning though, not for the faint of heart, as most might lose something (be it keyboard or controller).. **HAIL CROM!!**
